### **ISC and EtQ to Present Joint Webinar on Safety Management Systems for the Airline Industry**

**Sierra Vista, AZ—April 14, 2010**—ISC Consulting Group is pleased to announce that it will be co-presenting a webinar on Safety Management Systems (SMS) with EtQ, Inc. on May 19, at 1:00 ET.

The webinar, “De-Mystifying the Enterprise SMS: Technology Options to Automate Safety Management in the Airline Industry,” will detail the requirements of the Federal Aviation Administration’s (FAA) SMS initiative. It will discuss how technology can automate and streamline an airline’s SMS, as well as how technology can help reap the benefits of SMS for an organization. It will also feature a case study on how one air carrier is utilizing an Enterprise SMS technology solution to manage and promote safety within their organization.

“EtQ recognizes that SMS is a rising initiative in the airline industry, and will eventually be made mandatory,” stated Morgan Palmer, Chief Technology Officer at EtQ. “Our goal in this webinar is to inform attendees on how they can start taking steps toward implementing an automated SMS as well as the benefits that come with automation. We expect attendees to leave the webinar with a better understanding of SMS, what it means to them, and how they can take steps toward implementing SMS within their organization.” Larry Farris, ISC Consultant and long time SMS practitioner affirmed, “Safety management is about effective management of risk, so when we put an FAA Framework conforming Safety Management System into practice, we see decisions made by the right people for the right reasons...bottom line, we see better decisions.”

For more information or to register for this webinar, visit us on the Web at <http://www.etq.com/webinar>.

#### **About ISC Consulting Group**

ISC Consulting Group began their business in 2005 supporting key clients in the commercial and Military Intelligence markets. ISC continues to serve the commercial market by providing consulting expertise to their commercial clients in aviation. Offering a wide range of consulting services to commercial air carriers (14 CFR Parts 121 and 135), training organizations (14 CFR Parts 141 and 142), and FAA repair stations (14 CFR Part 145) as well as airports, educational institutions, and non-profit organizations, ISC’s senior practitioners bring real world experience that makes an instant impact on an organization’s ability to develop and implement Safety Management Systems. The end result of ISC’s single-source SMS consulting services is an SMS that not only conforms to the expectations of the FAA’s SMS Framework, but one that makes a measurable difference for their client’s operations. For more information, contact ISC at 520-378-6112 or email [steve.dufour@isc-cg.com](mailto:steve.dufour@isc-cg.com). Visit ISC at [www.isc-cg.com](http://www.isc-cg.com).
